## Experience Non-Invasive, Pain-Free, Fast-Results, Long-Term Relief with Chronic Pain Release Therapy (CPRt)

Chronic Pain Release Therapy (CPRt) is an evidence based treatment approach crafted to treat pain at its source. Our therapy sessions employ a combination of innovative tools designed to effectively and gently target scar tissue breakdown and address restrictions in the fascia. This approach aims at minimizing the inflammation commonly associated with chronic pain and sport injuries.

Our therapists utilize specialized tools for precise and targeted treatment:
